

DRONE FRANCHISE FOR SALE

D. Gillen

Dave Gillen

ORIGINAL AD**Franchise for Sale - [REDACTED]****Price \$80,000**

[REDACTED] we have been providing Remote Pilot Licence training and services to Tier 1 companies like BHP, Fortescue Metals Group, Georgiou and Water Corp to name a few. We are now offering you the opportunity to join the exciting World of drones.

With a focus on franchisee success and growth, [REDACTED] offers the ultimate business opportunity for those who want to build their own successful drone business.

Our franchise model will provide you with the tools, support, systems, partner network to give you a significant head start. You choose your territory and together we turn your drone business dream into reality.

We want to hear from motivated, energetic and entrepreneurial individuals, who want to join the exciting world of drones to deliver the best training and services in the industry.

If you believe you have what it takes to be a successful [REDACTED] business owner and have a passion for drones, business and customer service, we would like to hear from you.

NEW AD**WHEN THE DUST SETTLES ON THE DRONE BOOM,
WHAT WILL YOU BE LEFT HOLDING?**

If you'd love a career where you get to fly drones every day, you're in the right place.

But do you know what will suck the fun right out of flying drones?

STRUGGLING TO MAKE A CRUST!

If you're ever lucky enough or smart enough to see a revolution coming, you deserve to collect a financial reward so substantial that you'll never have to worry about making a crust again.

The next three years will never be repeated in the commercial drone industry. When it's over, do you want to be left with MORE than a job? MORE than a small business?

Then keep reading...

THE DRONE REVOLUTION

100 years from now, history will look back on these few years as the birth of the commercial drone industry. PwC, McKinsey, BCG, AUVSI, and CASA are all forecasting "revolutionary" levels of growth to 2023, 2025, and continuous growth to 2050.

Where is all this growth coming from?

The rapid expansion of commercial drone use in Mining, Oil & Gas, Construction, Agriculture, Power & Pipeline Inspections, Emergency Services, Shark Detection, Bushfire Monitoring, Package Delivery, and others we can't even predict.

ABOUT US

In 2016 [REDACTED] had the realisation that no matter which applications take off, every drone needs an operator. And every commercial operator (by law) needs training and a licence.

This is worth repeating: **Every commercial operator needs training and a licence.**

They started [REDACTED] on that simple basis.

Since then, [REDACTED] has trained more and more new drone pilots, and our growth has mirrored the growth of the drone industry.

OUR GROWTH

We started as a husband and wife team of two, and grew to 10 employees and contractors in three years. We now license pilots in Mining, Utilities, Agriculture, Photography, Emergency Services, News Coverage, and Construction. Clients include BHP Billiton, Fortescue Metal Group, Channel 7, Channel 9, Channel 10, and Water Corporation, to name a few.

Our CEO [REDACTED] has become a national drone authority and appears regularly on 9 News, The Morning Show, The Today Show, Huffington Post, Daily Mail & more.

As of 21st November 2019 we are at capacity. We're currently training new instructors, but it's not enough to keep up with demand. The [REDACTED] brand is in demand nationally, but we're still unable to service most areas.

WHY ARE WE FRANCHISING?

Limited staff and limited coverage of Australia make it impossible for us to service all the contracts we're offered. In fact, we already have \$80k in surplus contracts that we need help delivering (immediately). It's frustrating, but it means we have a sweet deal to offer our first business partner.

Here's what we're offering franchisee number 1...

WHAT'S INCLUDED?

- **Training** - You'll be trained as a drone pilot, drone instructor, and a drone business operator.
- **Equipment** - The latest drones and equipment. Everything you need to train and license drone pilots in any industry.
- **Prime Territory** - Be the first to lock in the major clients in your area (using our national reputation).
- **Business Systems** – Specialist software, operations, booking system, and trainin platform. We've spent over \$800,000 building these to make your daily operations easier so you can spend less time operating and more time growing.
- **Marketing Launch** - Use our brand, partnerships, and proven advertising campaigns to bypass the trial and error phase of getting your first clients.
- **Expansion Plan** – We'll help you expand your operation the same way we did. Your low overhead business is made for expansion, and the main task is to replace yourself with instructors (and we train them for you!)
- **Support** – Monthly mentoring, plus you will run your first training courses alongside an experienced instructor. You won't be left to do it alone.
- **Bonus** - **We're handing over \$80k in contracts for one WA territory.**

FRANCHISE COST

For the first franchisee to come on board, all the above has been included in your \$80,000 setup fee.

Our remote pilot training courses (RRP \$1,490 - \$2,790 per person) will help you recoup your investment quickly. We'll help you achieve this key milestone as quickly as possible, because it will give you the confidence to expand to a second location.

And this is going to sound bonkers, but it's true...

One WA franchisee will receive \$80k in contracts on day 1.

If you're reading this, you could not have timed it better.

WHO WILL THIS SUIT?

This is for someone who is confident they could build a substantial business in three years if placed into a booming industry, with a service that the entire industry depends on.

You're looking for more than just a fun job, or a comfortable business. You may have already had an eye on the rise of the drones. You might even use your background and contacts to specialise in an industry you know well.

You can run the franchise alone (or with a partner) to establish your first successful branch. We started as a husband and wife team and found it helped us do more in less time.

BUT YOU MUST ACT NOW

Everything we've done has been in preparation for the next 36 months.

Why? Because the Civil Aviation Safety Authority has predicted licenses will DOUBLE AGAIN BY 2023. If this wave of money rolls through for 3 years and all you're left with afterwards is a wage or a comfortable small business, that will be an opportunity missed forever.

Contact us quickly to get the first pick of territories, and do it today if you hope to get the bonus \$80k in contracts (one WA territory only).

FIRST STEP

Email [REDACTED] to request the [REDACTED] Franchise Brochure. We'll email it straight back to you.

You'll get all the details, and find out which territory comes with \$80k worth of contracts.

Any questions, call [REDACTED] personally on [REDACTED] for an informal chat.
